**Read the passage below and then answer questions 31 to 40.**

Joseph is the eldest in a family of five. He has to help his mother with the cooking in many ways. The kitchen is the most important room in their house.

Their kitchen is separated from the main dwelling house, so that the living room does not get untidy. The kitchen has two large windows so it is pleasantly supplied with fresh air for healthy and safe working moreover, some insects like to breed in dark kitchens.

They use a kerosene stove raised incase the children hurt themselves. This is unlike their neighbours who light fires on the floor. With a raised stove, food is also free from dirt and dust. Outside Joseph's kitchen they have a bamboo sun table, where pots and pans are left to dry. Her mother always said that sunshine kills bad germs.

**Read the passage below and answer questions 41- 50.**

Changes in animals include physical growth, reproduction and death. About physical growth, plants and animals become large, mature or become adults. Reproduction is the process by which plants and animals produce offsprings or youngones, of their kind death marks the end of earth plant's or animal's existence.

Animals of the same kind pass on certain traits. A trait is a characteristic that describes something. You and your classmates belong to the same human kind. You all have many of the same traits.

If you heard that a duck had hatched out of a chicken egg. You probably wouldn't believe it. It is a fact that animals produce young ones just like themselves chicken mate and produce chicks. Ducks mate and produce ducklings.

By youngones of each kind of an animal can continue of each parents. An animal life. Span is the time between its birth or hatching and its death.
